

TRIPTIC DISPLAYS

LARGE SCREEN SOLUTIONS FOR DAYLIGHT CONDITIONS

Hops Holographic Screen Supports

For those needing flexible and attractive daylight video displays the Hops (Holographic optical Projection Screen) is an excellent option, and now Triptic is extending the practical and aesthetic possibilities with a new range of support systems specially designed for the Hops screen.

V-Stander

The Triptic V-Stander is a simple and attractive support system for the Hops glass screens. The V-Stander is available in a selection of different colour finishes and is a simple solution many installations.

The V-Stander is available for 50" and 60" Hops screen sizes.

Suspense

An elegant way to suspend your hops

As the name suggests, the Triptic Suspense system is simply a very attractive aluminium and stainless steel cable suspension system for the Hops screens.

The Hops screen uses a single transparent holographic film that is laminated between two glass panels and is projected onto at an angle of between 30-40°, either from below the screen or from above the screen.

For those needing flexible and attractive daylight video displays the Hops Holographic is an excellent option and now Triptic is extending the practical and aesthetic possibilities with a new range of support systems designed for the Hops screen.

Suspense sizes:

Hops 32"	660 x 498 mm
Hops 40"	830 x 625 mm
Hops 50"	1030 x 780 mm
Hops 67"	1370 x 1040 mm
