

CONTINUOUS OPERATION (24/7)

of

F1 SXGA (p.n. 101-0001-00)

F1 XGA (p.n. 101-0002-00)

Related documentation is the User Guide as delivered with the product.

This is to state that the abovementioned F1 projectors are designed and manufactured to sustain continuous operation in professional installations, conditional to the following:

1. The unit must be operated within the specifications stated in the User Guide.
2. A maintenance plan according to the recommendations set forth in the User Guide must be established and followed.
3. Warranties are valid according to the product and lamp, as stated in the User Guide.

For best possible operation and longest lifetime, it is advised that the ambient temperature is kept below 25°C.
